

Deal Of The Day!

iPhone 14 Pro

The iPhone 14 Pro is a high end smartphone model from Apple that was launched in September 2022. It comes with 6.1 inch Super Retina XDR OLED display, featuring a resolution of 1170 x 2532 pixels and a peak brightness of 1000 nits. The phone is powered by Apple's A15 Bionic chip, which is touted to be 50% faster than the competition. The iPhone 14 Pro has a triple camera setup at the back which has 12 mega-pixel ultra wide sensor and a 12 mega-pixel telephoto sensor. It also features a LiDAR scanner for improved augmented reality experiences. The front facing camera, capable of capturing high - quality selfies.

Asus ROG Strix Scar 17

It's safe to say that the new balls-to-the-wall Asus ROG Strix Scar 17 is one of the best performance filled gaming laptops you can buy right now. The Strix Scar 17 is a thoroughbred gaming machine whose sole purpose is to run games without compromises. Everything from the design aesthetic to the internal components is focused on that singular goal.

Retailing at north of \$3,000, the Scar 17 has a superb build quality and packs the newest, fastest Intel i9-12950HX processor, an Nvidia GeForce RTX 3080 Ti, 32GB of DDR5 RAM, and a blisteringly fast FHD 360Hz 17" display. A similarly specced Razer Blade 17 costs almost \$500 more and doesn't quite match the performance of the Scar 17 .

The Strix Scar 17 looks and feels like a seriously powerful gaming laptop. It's big, bold, and has an edgy design aesthetic. The lid has a backlit ROG logo and hidden graphics that reveal secret codes(opens in new tab) under UV light while half the keyboard deck is translucent so you can see the internal components.

There's a vibrant, wrap-around Aura Sync RGB light bar that stretches across the front and sides with additional lighting on the bottom bezel of the display. The keyboard is also fully backlit and all the lighting is customisable in the Armoury Crate software hub.
